

LESSON ONE 'SPACE OF VARIATIONS'

SUPPORT MATERIAL: SPACE OF VARIATIONS, FIELD CONCEPT, SPACE OF VARIATIONS IMAGE CONCEPT, QUANTUM PHYSICS INTRO.

Welcome to the first lesson of Module I of the Reality Transurfing Life Management Series, titled **AWAKE**.

The objective of this lesson is to familiarize you with the theoretical background of that part of reality known to us as *The Space of Variations*.

At the end of this lesson you will have a deeper understanding of this concept and why Vadim Zeland chooses this knowledge as the basis for the Reality Transurfing Model.

We will also be speaking about the relevance of 'Choice' as well as 'Scripts' and much more.

This information will also act as the foundation for the future three lessons in this module.

Let's start with the fact that all forms through which our reality is manifested must have an origin, a place where the multitude of variations exist.

Where are the "laws" of our world recorded? The world reveals itself as matter moving through space and time and the moving matter is subject to certain laws.

As you may know, points are distributed on a function graphic according to a specific mathematical formula. We could say that the movement of a point on a graph is governed by a defined function.

[Type here]

[Type here]

However the formulas in laws are just abstract inventions of our intellectual minds, created to facilitate our understanding and to explain what we perceive with our senses. It's highly unlikely that nature is keeping these formulas and laws hidden somewhere.

How else can we fix points on the graph? Well, we could of course store the exact coordinates for each point, which immediately becomes a problem because there are an infinite amount of them. Our memory is only so big and cannot handle such a massive amount of information.

However, to nature infinity is not a problem. There is no need for nature to generalize the location and movement of points on the graph by using a formula.

If we were to break up a linear function into an infinite number of small points, then each point could be considered a cause and each consecutive point could be considered an effect. Thus, the movement of any material point in space and time can be viewed as an infinitely long and continuous chain of infinitely small causes and effects.

With our current knowledge, we represent the motion of matter using laws, while nature contains this motion in its pure form - of an infinite number of causes and effects. Broadly speaking, data about every possible material object, in its path along the infinite number of points, is stored in a field of information, which we will refer to as the Space of Variations.

There are an infinite number of scripts, life tracks, destinies, for each person in the Space of Variations. We have no reason to be resentful of our destiny because we have been given the right to choose. Our only problem is that we don't know how to do this.

The world reality exists in its multitude of possibilities, as if it was created to satisfy any and every possible need. Anyone can find everything they can ever possible want in this world. Even in different areas of science, the world appears to us just the way we want to see it.

For example, materialism is founded on the proposition that matter is primary and consciousness is secondary. Idealism claims the opposite. Neither of these philosophies has been proven, and yet models of the universe are constructed around both and the world agrees.

People argue amongst themselves imposing their opinions on each other, while the world shows that they are all correct in their opinions. Well, isn't that great?! The Space of Variations is the so-called "illusion" and material realization is what is meant by "physical reality". We always get what we choose!

SUMMARY

Reality can be manifested in an infinite number of ways.

The diversity of variations is the foremost and fundamental quality of our world.

The information field contains potential variations for any event.

Any world Model represents but a fraction of the multiple ways in which reality can appear.

Q & A

- **Q:** If the Space of Variations is a field of information. What information does it contain?
- **A:** What was, what is and what will be.

- **Q:** Why is having a solid understanding of this information crucial for successful practice of Reality Transurfing?
- **A:** Because, everything we intend to have, any information or materials we gather to further our happiness and even the Reality Transurfing Model are all pulled from the Space of Variations.

SUMMARY

The mind of man is constantly striving to resolve ambiguities. It really wants to shatter one theory to pieces, only to idealize another. Basically, this is what scientists do, century after century.

However, after each struggle for the truth, one fact remains on the battlefield: Any theory is nothing but a separate piece of the manifestation that forms our multifaceted reality.

Q & A

- **Q:** If the Space of Variations is a field of information. What information does it contain?
- **A:** What was, what is and what will be.

- **Q:** Why is having a solid understanding of this information crucial for successful practice of Reality Transurfing?
- **A:** Because, everything we intend to have, any information or materials we gather to further our happiness and even the Reality Transurfing Model are all pulled from the Space of Variations.

The mind of man is constantly striving to resolve ambiguities. It really wants to shatter one theory to pieces, only to idealize another. Basically, this is what scientists do, century after century.

However, after each struggle for the truth, one fact remains on the battlefield: Any theory is nothing but a separate piece of the manifestation that forms our multifaceted reality.

SUMMARY

Any branch of knowledge is based on a chosen aspect of the manifested reality.

Q & A

- **Q:** Why is the above statement pertinent?
- **A:** Because it supports the Reality Transurfing Model to maintain relevance (alongside all other theories within the Space of Variations).

Each theory is supported by the time during which it was developed, and therefore, it has the right to exist. Any view of life works in the same way.

If you have decided that fate is something predetermined, something that you were not in a position to change, then it will be that way.

[Type here]

In that case, you willingly put your life in someone else's hands, and it doesn't really matter in whose. You turn into a little paper boat that drifts aimless on the waves of the sea of life, bending to their will, you have lost control of your little boat.

On the other hand when you believe that you shape your own destiny, then you consciously take responsibility for everything that happens in your life. If you don't you'll be struggling with the waves.

Keep in mind that your choice is always made into reality. What you choose is what you get. Whatever worldview you adopt, it will be the right one. However, you should know that others will tend to disagree and argue with you simply because they are also right in whatever worldview they adopt.

DEFINITION OF CHOICE

Transurfing offers a fundamentally different approach to achieving your goals. You make a choice, just the way you would place an order at a restaurant, without giving a second thought to the means used to fulfil your order. Your wishes won't come true. But your choice is an immutable law, and it will inevitably be realized.

What choice making is all about would be impossible to explain in a few words. The whole of Transurfing is about what choice is and how to make it.

SUMMARY

Your choice is always made into reality. What you choose is what you get.

Q & A

- **Q:** Why is it that the worldview you adopt becomes true?
- **A:** Because all worldviews are simply choices that are manifested into your reality by the Law of Attraction

A human life, just like any other matter motion, is a chain of causes and effect. An effect in the space of variations is always situated close to its cause. In the same way as one follows the other, the near laying sectors in the space of variations assemble into a 'Life Track'.

[Type here]

Scripts and decorations of the sector found on the same life track are more or less uniform in their quality.

The human life line moves evenly along its track until there is an event that introduces a substantial impact in the scenario and decorations. Then a shift takes place and the life line crosses over onto a different life track.

You are always on life tracks, of which parameters correspond to your thought emissions. By positively changing your attitude towards the world, that is your thought image, you cross over to a different life track that has different beneficial alternatives, affecting events on your current life track.

SUMMARY

Waves of thought energy moves materialize potential variations.

A variation consists of a script and decorations.

When parameters of thought energy change, you move to another life track.

You can't change the script of a variation, but you are able to choose another one.

Don't fight for happiness - you can simply choose a variation that you like.

Q & A

- **Q:** Are positive though emissions enough to transport you to an alternative life track?

A: No, one must use positive thinking along with fulfilling certain conditions in order to successfully transfer over to more favourable life tracks. Dreams do not just come true.

CONCLUSION

According to the concept of the world as described in Transurfing, we've learned that reality has an infinite variety of forms of expression. This means that there is an informational structure that contains an infinite number of potential possibilities – possibilities of the material manifestation of the world and its way of working.

[Type here]

Space of Variations can be represented as a tree with infinite number of branches and leaves, where each branch (Script) refers to a specific variation.

From this lesson comes the First Golden Rule of Reality Transurfing: *The emission of the mental energy induces the material manifestation of the chosen option.*

This means that the thoughts we are broadcasting, without us noticing it, attracts those sectors of the Space of Variations that literally meet our thoughts.

According to Transurfing, we cannot change the already manifesting script (meaning we cannot modify the sector of the Space of Variations in which we move), but we are able to select a different scenario and move to another track of chosen options, simply by changing the parameters of our thought/feeling emissions.
