

MODULE II AWARE - LESSON 6 – FLOWING

SUPPORT MATERIAL: FLOWING

The alternatives space is an information field or energy matrix, a template for what things could be like. When a sector of the matrix is lit up by an energy that has the same resonance, that part of the template is transformed into physical reality. The question is whether the information held in the matrix can be used whilst it exists in its intangible form. You could say that we are using this information on an everyday basis. The conscious mind might not be able to read the information held in the alternatives space but the subconscious (The Heart) can access it directly. This is where premonitions, intuition, prophecies, inventions and works of art originate. The conscious mind sources information both by interpreting data from the external world and by receiving it from the subconscious via intuition. Put bluntly, the data recorded in the information field represents truth in its purest form. It represents objective information undistorted by interpretation.

SUMMARY

- The mind interprets information using a set of established designations.
- The heart does not think or speak. It feels and knows.
- Fundamentally new discoveries originate in unrealised sectors of the alternatives space.
- A discovery is made when the mind is able to interpret information accessed by the heart.

Q & A

- **Q:** The question is whether the information held in the matrix can be used whilst it exists in its intangible form.
- **A:**
- **Q:** How do we perceive or receive information from the matrix.

REALITY TRANSURFING STEPS I-V CHAPTER VI. ALTERNATIVES FLOW - The Needy, the Indignant and Fighter

SUMMARY

- *In any situation a person can respond with extremes of behaviour.*
- *One extreme is to be swept along by the current like a powerless paper boat and the other is to row stubbornly against the tide.*
- *The needy create excess potential via their feelings of guilt, voluntarily offering themselves into the hands of manipulators.*
- *The indignant person creates excess potential with their continuous expression of dissatisfaction and ruins their own life by endlessly invoking balanced forces.*
- *And the fighter, overcomes all obstacles only to reach the shore exhausted and unable to savour the "fruits" from the hard labour.*

Q & A

- **Q:** Why does getting caught in the vortex of your mind set is prejudicial to you.
- **A:**
- **Q:** How do you invert the above reactions of the above two main types of response
- **A:**

How can we distinguish between an approaching sandbank or waterfall and a normal turn in current? There are always tangible signs that will help us navigate ourselves through life. Life is constantly sending us signs.

SUMMARY

- *The most common, well-known sign is an omen.*
- *Even if a person is not particularly superstitious the strong social stereotype throws a shadow across their subconscious.*
- *There are good and bad omens.*
- *Seeing a rainbow is a good omen. A black cat crossing the road is an omen of misfortune and so on.*
- *If the percentage of correctly predicted omens is high enough, a certain pattern is determined which then becomes public opinion.*
- *Because people love to talk to one another about strange phenomena, it becomes a belief.*

Q & A

- **Q:** If omens have no direct influence on the events in our lives, then what do we mean when we talk about Guiding Signs?
- **A:**
- **Q** Why is it important to spot and take notice of Guiding Signs?
- **A:**

CONCLUSION

Signs can take various forms but in each case the most useful thing to do is decide whether the meaning invokes a sensation or reaction in you whether positive or negative.

For example, if you are in a hurry and an old lady with a stick blocks your way this could be interpreted as meaning that you will be delayed, that the bus that normally crawls along will for some reason fly past today; Perhaps you went too far in a situation and should be more careful, or maybe you are trying to do something that is not going very well and no matter what you do obstacles keep getting in the way bringing things to a grinding halt. Maybe you have chosen a dead-end road and should take a different route. The main benefit of signs is that they have the capacity to wake you up in time, making you see if you are acting in the interests of a destructive pendulum or to your own advantage.
