

## The Pendulum

The pendulum grows in power according to the number of human beings feeding it, Examples of pendulums are political parties, religious groups, multi nationals organisations, sports teams, races, countries, families....smaller pendulums eventually get taken over by more powerful greater ones, creating ever larger magnetic fields that we refer to often as the system or collective consciousness

The very relevant point to note from the foregoing is that when a pendulum reaches a certain maturity it goes completely autonomous and because it is an energy angry aggregate thought/emotion form, it turns to the creators for maintenance at all costs, by living off their energy.

All human beings are, in some way or form, connected to a variety of Pendulums (magnetic fields). A pendulum can be either negative or positive, depending on the quality of vibration or frequency of its creator's thoughts and emotions.

The only way that one can be rid of a non beneficial pendulums is to affiliate with a stronger beneficial one. Perhaps with care we could together create a beneficial all serving pendulum using the technology of Reality Transurfing presented to us by the Russian author Vadim Zeland.
